

TXHU Head Mounting Universal Input 4~20mA Transmitter

The TXHU range of low-cost, loop powered, microprocessor based linearised transmitters have, as standard, a universal input that accepts RTD (Pt100 or Pt1000) and Thermocouple (Types K, J, T, N, E, R, S, B) inputs. The transmitters can be supplied pre-ranged to suit your application requirements or can be easily configured using the TX-USB configuration kit (see page 86). Simply install the software (which is available for free download from our website), connect the USB configuration module and plug the lead into the transmitter. The software will then provide the necessary prompts.
