

**APB Pressure/Vacuum Transmitter**

The APB range of high accuracy, low cost ceramic pressure and vacuum transmitters are designed for use in most industrial applications and are suitable for the measurement of most pressure mediums.

The transmitters incorporate a high quality thick-film ceramic sensor and special amplified circuit. Outputs are available as 4~20mA current loop, 0~5V DC and 0~10V DC. The pressure diaphragm is made from ceramic material and its wetted parts are made from 316L stainless steel.

Because of the thermal stability of ceramic and its thick-film resistance, the transmitters can be operated at a higher temperature range; at the same time this makes the zero and sensitivity thermal shifts over the whole operating temperature range of the transmitter very small.

- 4~20mA, 0~5V and 0~10V output options
- Pressure and vacuum options
- Vast pressure measurement range
- Automatic testing and laser trimming compensating zero and sensitivity
- Wide application scope and long service life
- High accuracy and long-term stability
- Good anti-corrosion and anti-impact ability

Main body terminals

4~20mA (2-wire) output wiring example

0~5V and 0~10V output wiring example

**Technical Details**

<b>Pressure Medium</b>	Gas or liquid compatible with ceramic and stainless steel
<b>Pressure Range</b>	-1 ... 600 bar
<b>Overload Pressure</b>	150%FS
<b>Output Signal</b>	4~20mA Current Loop, 0~5V DC, 0~10V DC
<b>Accuracy</b>	0.25%FS
<b>Load Resistance</b>	$RL = (U - 12V) / 0.02A$ (4~20mA current output) U-loop voltage (V)
<b>Long-Term Stability</b>	< 0.2%FS/year
<b>Supply Voltage</b>	12~30VDC
<b>Compensated Temperature Range</b>	0~70°C
<b>Operating/Storage Temperature Range</b>	-20°C to +80°C / -30°C to +90°C
<b>Temperature Coefficient Of Zero</b>	0.3%FS/10°C
<b>Temperature Coefficient Of Span</b>	0.3%FS/10°C
<b>Insulation Resistance</b>	100MΩ@50VDC
<b>Process Connection</b>	G 1/4 (G 1/2 available on request)
<b>Electrical Connection</b>	Hirschmann style connector (others available)
<b>Material of Wetted Part</b>	1Cr18Ni9Ti
<b>Material of Pressure Membrane</b>	Ceramic (Piezoresistive pressure sensor above 200 bar)
<b>Material of Housing</b>	1Cr18Ni9Ti
<b>Sealing</b>	N-Butyronitrile or Fluoro-Rubber Sealing Ring

4~20mA current loop output
