Conflict Minerals SEC Reporting

Thermosense Ltd is committed to helping its customers meet their Conflict Minerals SEC reporting requirements under the Dodd-Frank Wall Street Reform and Customer Protection Act to the extent that it is able.

As a responsible manufacturer we actively promote the traceability of these materials and the transparency of its supply chain. Whilst Thermosense is not subject to reporting under section 1502, it fully understands the importance of this issue and is committed to working with its suppliers to provide products that meet the customers' specifications, while seeking to ensure transparency throughout its supply chain as to the use of conflict minerals.

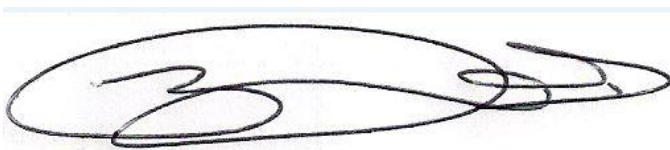

We have contacted all of our relevant suppliers to ensure that none of the products they supply to Thermosense Ltd are in contravention of the act.

Working together, Thermosense and its suppliers will provide reasonable assurance to our customers that the products we sell, including their component materials, are responsibly sourced.

If it is apparent that any of our suppliers are contravening this act we will take the appropriate action.

Should you require any further assistance or information please do not hesitate to contact me.

Yours Sincerely

Ryan Davis
Thermosense Ltd
